PROFESSIONAL SUMMARY

Technical support engineer with hands-on experience supporting a production legal-AI SaaS platform: incident response, root-cause analysis, login and data-security fixes, and pre-release checks. Brings seven years of customer-facing hospitality operations, so I'm comfortable explaining technical issues in plain language to customers and coordinating fixes with engineering teams. Immediate joiner.

CORE COMPETENCIES

Technical Support: Incident response, Root-cause analysis, Troubleshooting login/auth issues, Release smoke testing, Runbooks & documentation
Tools & Tech: SQL / PostgreSQL, Python, Git & GitHub, Browser DevTools, Power BI / Excel, Claude / Anthropic API
Customer Success: Onboarding support, De-escalation, Follow-up discipline, Retention mindset
Communication: Clear written & verbal English, Cross-team coordination, Status reporting

PROFESSIONAL EXPERIENCE

AI / Software Engineer — Platform & Support 2025 – 2026
Chakshi — Legal-Tech AI SaaS Startup

- Resolved production incidents and reliability issues on a live SaaS platform, restoring user-facing services (registration, login, scheduled reminders) and documenting clear root-cause reports.
- Built internal customer-success and admin support dashboards giving the team visibility into user activity, billing and system health for faster issue resolution.
- Improved onboarding and account flows (email verification, entitlement and billing fixes), reducing friction for new and existing users.
- Acted as first responder during a live production outage, tracing the fault to a database connection, a missing index and a misconfigured sign-in setting, and restored user registration and login within a single session.
- Investigated and closed a critical login-security issue and a cross-account data-visibility issue on a multi-tenant platform, protecting customer data and trust.
- Wrote 18+ root-cause reports, runbooks and incident records, turning recurring user-facing problems (expired login sessions, missed reminder emails, missing AI citations) into documented fixes and repeatable support procedures.
- Ran browser smoke tests and release checks before updates, verifying sign-in, core user journeys and rollback readiness so customers saw fewer issues after releases.
- Triaged and tracked 50+ pending fixes and requests in a prioritised work register, and shipped 150+ reviewed improvements in about four months.

Operations Manager 2019 – 2024
Hospitality Business — Mettupalayam, Coimbatore

- Managed day-to-day operations, customer relations and staff for a family-run hotel business, handling guest queries, complaints and special requests to keep satisfaction high.
- Coordinated vendors, scheduling and cost control, improving service efficiency and smoothing peak-season operations.

Front Office Assistant Aug 2017 – Dec 2018
Black Thunder Resort (Leisure Hotel) — Mettupalayam, Coimbatore

- Handled front-desk guest service, reservations, check-in/out and enquiries in a high-footfall resort, acting as first point of contact for guests.
- Resolved guest concerns promptly and coordinated across departments; commended by management for work and conduct.
